PROFESSIONAL SUMMARY

Backend Engineer with extensive experience in designing and developing backend APIs for SaaS applications, employing **Python** and the **Django Rest Framework** to enhance response times by 30%. Proficient in building comprehensive **permission and authentication security systems** that bolster data protection. As a team lead, I foster collaboration to tailor software solutions, achieving a notable 25% increase in client satisfaction ratings. My unique blend of technical expertise and leadership ensures impactful contributions to software development and network performance.

WORK EXPERIENCE

Backend Engineer

Dec 2024 - Present

Manu Josh Networks

Nairobi, Kenya

- Designed and developed a robust backend API for SaaS applications using **Python** and the **Django Rest Framework**, enhancing response times by 30%.
- Built a comprehensive **permission and authentication security system** that significantly improved data protection, addressing potential vulnerabilities effectively.
- Led a team of backend engineers, collaborating closely to understand client needs and *formulating tailored software solutions*, which resulted in a 25% increase in client satisfaction ratings.

Network Engineer

Mar 2021 - Dec 2024

Tech Solutions Inc.

San Francisco, USA

- Led the **implementation of network design and topology** projects, ensuring seamless integration and optimal performance across various platforms.
- Utilized **Cisco Orchestrator** and GNS3 to simulate complex network scenarios, which facilitated troubleshooting and enhanced the overall reliability of the network.
- Collaborated with cross-functional teams to overcome the challenge of a major system downtime, reducing recovery time by 30% through strategic planning and effective communication.

EDUCATION

Advanced level Certificate of undergraduate in computer networking.

Jan 2020 - Aug 2023

Hope Technical

Gisenyi, Rwanda

- Engaged deeply in **cybersecurity** through coursework in *Computer Systems and Technology* and *Computer Networking*, which laid the foundation for my career.
- Continuously enhancing my skills in **internet technologies**, leveraging concepts learned in class to solve real-world problems at work.

Certificate of ordinary level in general education

Jan 2017 - Dec 2019

Amahoro Anglican School

Gisenyi, [Your Country]

- Developed a strong foundation in the sciences, particularly excelling in **physics**, which ignited my passion for further scientific exploration.

- Participated in various *study groups and science fairs*, fostering collaborative learning and deepening my understanding of complex concepts.

Certificate of primary level in general education

Jan 2011 - Dec 2016

Amahoro Anglican school

Gisenyi, Rwanda

- Demonstrated strong academic performance in Mathematics and Science throughout primary education.
- Exhibited a high aptitude for analytical thinking, problem-solving, and scientific subjects from an early age.
- Consistently achieved excellent results in Mathematics, laying a strong foundation for engineering and technical studies.

</> SKILLS & EXPERTISE

Programming: Python | C | Javascript | System Design | Network engineering | Problem solving | GNS3 | DJANGO | API | Cisco Packet Tracer | MYSQL

</> PROJECTS

Fish Depot Management System

Jan 2026 - Present

Full-stack Engineer

- Designed and developed a web-based Fish Depot Management System that integrates Point of Sale (POS), inventory management, customer management, and supplier coordination functionalities.
- Enabled seamless communication between customers and suppliers, allowing fish products to be ordered and supplied on demand.
- Implemented real-time inventory tracking to improve stock management, reduce waste, and enhance operational efficiency.
- Automated sales, order processing, and inventory updates through an integrated POS system.
- Improved business operations by providing a centralized platform for managing transactions, stock levels, customer requests, and supplier interactions.
